

FEATURE

TOM CONNECT

The modem-based communication service TOM Connect is a standard feature that enables TOM to send a message when its time for a bag switch or the machine requires maintenance. It is perfect for environments where many receptacles need to be spread out in a large area like an airport, mall or theme park. No more rounds on routine just to check on the status of the waste bins! Only go see TOM when it needs attention and alerts you.

TOM CONNECT BENEFITS

More productive use of time for your staff. Only visit TOM when notified!

Excellent service for the visitors: With timely bag switches, TOM is always in operation and it contributes to a clean and inviting environment at all times.

Stay in control: The web portal provides an overview of the current status of all your units.

TOM SENDS A MESSAGE

TOM communicates by email and is able to send two types of messages to its caretakers:

- 1) The bin is almost full and TOM requires a new bag.
- 2) TOM needs maintenance

FREE ACCESS TO CONNECT WEB PORTAL

When your first TOM is installed, you will be invited to Connect Web Portal, where you can log in any time to monitor the current status of your fleet of TOM:s. In the portal you easily add notification recipients for your organization.

INCLUDED IN THE PRICE

The license and the subscription fee for the first 12 months of use are included in the deal. After the first year the service will be prolonged, if not actively terminated, and you can continue to benefit from TOM Connect at a monthly fee. A SIM card is already implemented in the modem, so you do not need to worry about local operator agreements or additional unanticipated costs.

TOM CONNECT FOR UNITS IN THE FIELD

For existing TOM units delivered before TOM Connect became a standard feature, you can order the TOM Connect Retrofit kit, article no. 4890174-00, from us today. The kit includes a user license for 12 months.
