

# EXCELLENT SERVICE

## AROUND THE CLOCK WITH TOM

**MEET TOM - A NEW WASTE COMPACTION SYSTEM FOR AREAS WITH HIGH FOOT TRAFFIC.** TOM IS NOT A CONVENTIONAL WASTE BIN. He is smart, dutiful, quiet and compacts, accepting up to 7 times more waste, before the bag is full. Thanks to Connect, an optional communication service, TOM is able to send a message when a new bag or maintenance is required. No more rounds on routine just to check on waste bins! The cleaning staff only needs to visit TOM when alerted, which means better resource allocation for you as facility manager. Your team will have more time to attend to different locations.

TOM automatically opens the shutter when approached and the hands-free operation is a great hygienic feature. TOM keeps the environment tidy and inviting and is the ideal concept for malls, shopping centers, hospitals, train stations and airports. Imagine the clean and efficient waste management with TOM installed at all the sites in your care!

### BENEFITS FOR YOUR BUSINESS

**Increased productivity** = better allocated resources for the cleaning crew

**More space and lower waste transportation costs** thanks to effective volume reduction

**Clean and orderly environment**

**Hygienic touch-free concept**
