

## PRESS RELEASE: ORWAK CELEBRATES MACHINE NO. 100 000

**Orwak celebrates the production of machine number 100 000 in our factory in Sweden! We have been designing and manufacturing high-performance waste compactors here since 1971.**

Today, Orwak is a world leader in waste compaction solutions, but it all began in the 70s, when Orwak invented the classic in-bag-compactator 5030, a patented solution that was displayed at major exhibitions and led to an early international success.

The 5030, in new design, is still going strong and maintains its solid market position in the hotel & restaurant segment.

*Machine no. 1, back at Orwak after 45 years of service*

*The classic 5030 today in new design and still a best seller in its niche*

Over the years, the focus in the product range has shifted to vertical balers and automated systems. Orwak has always been in the forefront of innovation and develops new concepts and provides the market with innovative waste handling and recycling solutions. Since the beginning in the 70s, the Orwak machines have traveled far and wide and the installed base in the world is substantial. Our balers and waste compactors have reached every continent, even a research station in Antarctica!

In spring 2018, Orwak launched the newest addition to the product range, model 3120; a baler that offers strong compaction on the spot: compact machine design, yet convincing volume reduction and a bale weight of up to 100 kg. It is part of our new generation of balers with intelligent features and prepared for M2M communication.

*The new model 3120 featuring modern design, extra wide loading gate and semi-automated bale ejection*

The launch was a success and it has become a very popular part of the range. Therefore, it is not surprising that machine no. 100 000 is of model 3120 and today, the devoted Orwak team is gathered to celebrate the happy occasion. We are proud of it and all the prior 99 999 successful deliveries since 1971 and are looking forward to many more to come!

Tomas Johansson, Sales & Marketing Director at Orwak, comments:

“This is an important milestone in Orwak’s history, showing our strength as a worldwide, world-class manufacturer of waste compaction equipment. All members of the Orwak team both at the factory and around the world should be proud of the joint effort to be where we are today.”

**About Orwak:**

Orwak is a world leader in compaction and baling solutions and offers an innovative range of products that promotes sorting at source and make waste management more profitable. Orwak is headquartered in Sweden and is present in approximately 40 countries through subsidiaries and distributors.
