

# OPTION ORWAK CONNECT

**BENEFIT EVEN MORE FROM YOUR NEW POWER BALER - LET IT COMMUNICATE!** We are happy to present Orwak Connect, a new smart option, for our innovative and dynamic POWER baler range. Orwak Connect is a modem-based communication service enabling the baler to send a message for full bale or if the machine requires maintenance. Furthermore, the service gives you unique supervising opportunities! Log into the Orwak Connect web portal to monitor your fleet of balers and the number of bales they generate during a specific period of time! A premium option is a built-in scale for measuring the bale weight and it gives you full control over bales produced.

## ORWAK CONNECT BENEFITS

**Stay in control:** The web portal provides an overview of the status of your POWER balers as well as statistics on the baling frequency and the number of bales produced.

**Uninterrupted use:** The caretaker gets notified as soon as the baler is full or needs maintenance and can make sure that the machine is in operation again quickly to avoid unnecessary downtime.

**Productive use of time & optimal logistics:** No need to check on the balers on routine; especially good feature if you have several balers spread out in vast premises or in several remote locations! Based on the information in the portal, you can also plan the bale collection routes efficiently.

## ORWAK CONNECT

- + **Sends messages:** "Full bale" & "Fault, baler needs maintenance"
- + **Free access to the web portal**
- + **Bale counter & baling statistics**

## ORWAK CONNECT PLUS

- + **Built-in scale** for bale weight statistics

## CONNECT FEATURES

### THE BALER SENDS A MESSAGE

If recipients are registered in the portal, the baler sends an E-mail when the unit needs attention.

### FREE ACCESS TO ORWAK CONNECT WEB PORTAL

When ordering Orwak Connect, you will be invited to the web portal, where you can log in to monitor the status of your balers, add notification recipients and gather statistics on baling performance.

### INCLUDED IN THE PACKAGE

The modem, the license and the subscription fee for the first 12 months of use are included in the deal. A SIM card is already implemented in the modem, so you do not need to worry about local operator agreements or additional unanticipated costs. After the first year, the service will be prolonged, if not actively terminated, and you can continue to benefit from Orwak Connect at a monthly fee.

## ORWAK CONNECT BALE STATISTICS IN THE WEB PORTAL

Bale data are sent automatically to the web portal. Set the start and end date in the calendar in the portal to view the bale statistics for each individual baler.

The screenshot shows the ORWAK Connect Portal login interface. It features a red background with a white login box containing fields for 'Username' and 'Password', and a 'Login' button. Below the login box is a link that says 'Forgot your password?'. Below the login box is a 'Statistics' window with a red header and a close button (X). The window contains date pickers for 'Start' (2015-10-03) and 'End' (2015-11-03), an 'Apply' button, and a summary of statistics: Bale count: 78, Press cycles: 3508, and Alarms: 0.

## ORWAK CONNECT PLUS

The built-in-scale is based on 4 load cells connected to a display, which shows the current bale weight (the load in the chamber). The data is transferred to the portal where you can view the weight of every single bale produced by the baler in a specific period of time.

Bale Statistics		
Start:	2015-06-05	End: 2015-11-05
Apply		
Time	Bale counter	Bale weight (lbs)
2015-07-27 18:34:31	1	1089
2015-07-27 19:34:43	2	1109
2015-07-27 20:34:55	3	1095
2015-07-27 21:35:08	4	995
2015-07-27 22:35:20	5	1098
2015-07-27 23:35:32	6	998
2015-07-28 00:35:45	7	1045
2015-07-28 01:35:57	8	1082
2015-07-28 02:36:09	9	1096
2015-07-28 03:36:22	10	1070
