Important information: Orwak implements an email security solution

Dear partners and clients,

Orwak AB will soon implement a new email security feature and we want to inform you about it and how it works.

Why do we implement this?

The new anti-spam solution Mailinblack Protect will protect the emails from cyberattacks and viruses and ensure that only clean and productive emails are delivered to us.

How does it work?

The first time you send an email to a recipient in our company, you will be asked to verify your identity. It is a two-step authentication that only requests a few seconds of your time!

Step 1: A request is sent to you, and you click on the button "I am not a robot".

Hello,

You have just contacted me by email for the first time. In order to protect our data, my email is secured by Mailinblack anti-spam.

To have your email delivered to me, please click on the button below and copy the captcha to prove that you are not a robot.
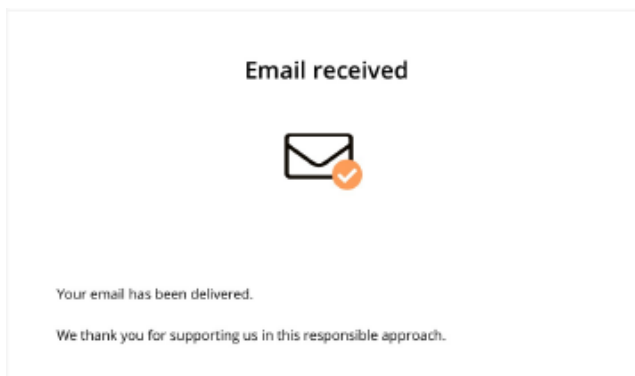

I'm not a robot

Step 2: You will be asked to fill in a captcha, the colored word you see among the others (in this example "Messaging" and click "Done":

Authentication

Type the coloured or listened word

Newsletter   News
Penpal   Messaging   Contact   Priority
Expertise   Professional   Network
Experience   Relationship   Social
Easy   Human   Security

Type the coloured word   ⟳   🎧   Done

Your email will now safely be delivered to your contact in our company, and you will receive a confirmation:

Email received

Your email has been delivered.

We thank you for supporting us in this responsible approach.

Next time you email this recipient, it will go through automatically without any authentication request.

Thank you for your understanding and cooperation! If you have any questions, feel free to contact us!

Best regards,

Team Orwak
