

# SUCCESS STORY

## CITY & COUNTY GRAPHICS

### ABINGDON, UK

#### ORWAK IN-BAG COMPACTOR CUTS SKIP COSTS AND CARBON FOOTPRINT IN HALF

The nationwide signage and marketing suite provider reduces the volume of the non-recyclable waste from the production with the classic Orwak in-bag compactor FLEX 5030 on site.

**ESTABLISHED OVER 30 YEARS AGO**, City & County Graphics in Abingdon, Oxfordshire, has evolved into a multimillion pound, nationwide signage and marketing suite provider for some of the most well-known house builders within the UK.

#### Reduce the volume of unavoidable waste

The production generates a lot of non-recyclable light weight waste that fills up a skip fast. Due to the nature of the business, the waste is unavoidable, but the team is keen to improve the environmental impact and can accomplish that by volume reduction and thereby fewer waste transports and CO<sub>2</sub> emissions.

#### Immediate success

City & County Graphics first trialed the versatile and effective Orwak in-bag compactor FLEX 5030 for a week and it was an instant success immediately cutting their skip costs and carbon footprint in half!

When baling is not an option, other compaction solutions are still at hand to make waste management more profitable as well as contributing to environmental benefits.
