

COMPELLING COMPACTION SOLUTION FOR BAGGED WASTE IN BINS

Are you in the hotel and restaurant business? Are bulky waste bags from cleaning and the kitchen area piling up? Do they quickly spill over the top of the bin, occupying way too much storage space and requiring far too frequent waste collections? We know the challenge well and are happy to introduce the new in-bin compaction solution FLEX 1100 to deal with it.

FLEX 1100 is an in-bin compactor designed to fit any brand of 1100 L bin in the market. Simple to use and based on an effortless “roll in, roll out” concept, it effectively compacts the bagged waste directly in the bin. It is a hygienic waste solution for mixed general waste and thanks to the volume reduction, the compactor saves space, transport and costs.

SMART AND COMPACT DESIGN

Keeping the value of saving space in mind, the FLEX 1100 comes with a smart and compact design and takes up only a square meter floor space. A lifting plate protects the bin wheels from being damaged during compaction and the machine is robust and prepared for tough conditions. The lifting plate is galvanized, and a good finish and easy access facilitate daily cleaning.

YOUR SAFETY IS OUR PRIORITY

Safety and quality are Orwak's hallmarks, and this in-bin compactor features two-hand operation and meets performance level C to always keep the operator safe. Furthermore, the low sound emission contributes to a good working environment.

ADAPTABLE TO THE CONDITIONS ON SITE

To easily adapt to the conditions on site, the user-friendly operating panel can be placed on the left- or right-hand side of the machine. To meet the demand for installation in different types of environments, FLEX 1100 comes with multigrade oil as standard to maintain high performance at low temperatures.

Experience the new compaction solution for bagged waste and benefit from the advantages it provides; more productive use of storage space and money!
